

Assignment

Read my entire workspace and understand how UI implemented in the frontend folder

I want to add "Connect Jira" button to establish the connection(Base url

Email id,Jira API key_)

once the jira is connected userstories should be populated in the UI screen.

[STRICTLY] DO THE IMPLEMENTATION ONLY ON UI

After Implementing the UI changes, ensure that the "Connect Jira" button is functional and triggers the connection process. Upon successful connection, fetch the user stories from Jira and display them in a structured format within the UI.

The screenshot displays a web application interface for generating test cases. On the left, a form is used to create a user story and connect to Jira. The form includes fields for 'Story Title', 'Description', 'Acceptance Criteria', and 'Additional Info'. Below these is a 'Connect Jira' section with fields for 'Base URL', 'Email ID', and 'Jira API key', and a 'Connect Jira' button. A red error message states: 'Base URL, Email ID, and Jira API key are required to connect.' At the bottom of the form is a green 'Generate Test Cases' button. On the right, a dashed green box contains a green icon of a test case, the heading 'Your test cases will appear here', and instructions: 'Fill in the story details on the left and hit Generate. We'll craft positive, negative, edge, and more test cases for you.' Below this are four buttons: 'Positive', 'Negative', 'Edge', and 'Authorization'.

Story Title *

Enter the user story title...

Description

Additional description (optional)...

Acceptance Criteria *

Enter the acceptance criteria...

Additional Info

Any additional information (optional)...

Connect Jira

Offline

Base URL

https://company.atlassian.net

Email ID

name@company.com

Jira API key

Enter your Jira API key

Connect Jira

Base URL, Email ID, and Jira API key are required to connect.

Generate Test Cases

Your test cases will appear here

Fill in the story details on the left and hit Generate. We'll craft positive, negative, edge, and more test cases for you.
